

Biography

Masayasu Totani was born in Nara, Japan, in 1985. He studied applied chemistry at Osaka Institute of Technology. And then he studied division of materials science at Nara Institute of Science and Technology (NAIST), where he received his Ph.D. in 2014 under the supervision of associate Prof. Tsuyoshi Ando and Prof. Masao Tanihara. From 2017 to 2023, he joined Kyushu University as a research assistant Prof. in the research group of associate Prof.

Hisao Matsuno and Prof. Keiji Tanaka. He was appointed as assistant Prof. in the research group of Prof. Jun-ichi Kadokawa of Kagoshima University in 2023. His research interests focus on synthesizing functional polymers and controlling the polymer interface. He received the investigator awards for Macro/NAIST Joint Workshop for Emerging (2012).
